

******REVISED ViCAP ALERT******
UNIDENTIFIED RECOVERED BODY

Attention: Homicide, Cold Case, Missing Persons, and Crime Analysis Units

REVISION: The “re-touched” photo has been created and added to this Alert in an effort to identify “Jane Doe.”

Original Alert Information:

On March 18, 2007, the nude body of an unidentified female, “Jane Doe,” was found in Prairie View, Waller County, TX, near US HWY 290. Prairie View is approximately 50 miles northwest of Houston, TX.

“Jane Doe” is described as white or Hispanic, approximately 30 years old, 5’4”, 151 lbs., brown hair and green eyes. The victim’s teeth were decayed and a dental chart is available for comparison purposes. It is believed she had been dead approximately two (2) hours.

A plastic bag had been placed over the victim's head and secured with duct tape around her neck. In addition, the victim's hands had been severed from the body and have not been found. The ends of the victim's arms were covered with the same type of plastic bag used to cover the head, and secured to the arms with duct tape. The victim’s head hair and pubic hair had been closely cut. “Jane Doe” died of asphyxia due to external neck compression (hyoid bone was broken).

The Prairie View Police Department, Texas Department of Public Safety, and FBI ViCAP Unit are requesting assistance in identifying “Jane Doe” in order to determine when and where she disappeared and fell victim to this crime.

In addition to identifying “Jane Doe,” the unique circumstances of her demise indicate the offender may have committed this type of crime in the past. If any agency has a similar case (or cases), please contact the following:

Sgt. Brian Taylor,
